

# Fun 1.0 - Linux Home Server

Setup notes from my Linux Home Server used to perform,

- Cloud Backup
- [Media Server Plex](#)
- ...

## Base Setup

Normally avoid UI, but no way around it to keep things simple for the Cloud Backup service. So since I am using a lowly T500 with 4 GB of memory using Lubuntu 14.04.3 which has a number of bugs unfortunately.

## Setup and Fix Vino (VNC Server)

Install

Start

Fix Encryption Bug

There is a [bug with encryption when connecting with Mac OS X VNC client Screen Sharing](#). While running GUI, gsettings set org.gnome.Vino require-encryption false

Autostart Before Login

..

## Mounting Bug

...
