

Compare Confluence 4.x Upgrade Files From Command Line

- [Mac OS X Command Line Reference Setup](#)
- [Mac OS X Command Line Reference](#)
- [Araxis Merge Windows Command Line Reference](#)

This is not working yet. I need to figure out how to spawn windows and the open command seems to lose the class path settings,

```
#!/bin/sh
export PATH=$PATH:/Applications/Araxis\ Merge.app/Contents/Utilities
