

Graphics Design - Printing Photography

Print

Most printshop (2016) print at 300 PPI so ideally 1800 x 2400 pixels **prints** 6" x 8",

$1800 / 300 = 6"$ $2400 / 300 = 8"$
--

What about DPI? That's for scanning in.

To do fancy collages, you may want to leverage [existing templates from websites like Design Algow](#).
