

# Microsoft Azure Journey

## Rough Notes

Microsoft Azure was the first Cloud Service we started when balancing the hosting of [www.bonsaiframework.com](http://www.bonsaiframework.com) and Microsoft's clarity of instructions and reputation for easy to use UI.

Experiencing the product, we encountered Microsoft's weaknesses when rolling out new products,

- No advanced instructions.
- Consequence of user community sticks to gui
- Lack of maturity for long term steady state

Here are the key challenges,

Issue	Description	Mitigation
32 Hard Disk Limit	...	
No Client for Azure Blob Backup	On first blush, no viable backup solution to support Files.  There are GUI, but <a href="#">no automation friendly command line tools officially build by Microsoft</a> as of Aug 2017.	
Backup Solutions	<a href="https://azure.microsoft.com/en-ca/solutions/architecture/backup-archive-on-premises-applications/">https://azure.microsoft.com/en-ca/solutions/architecture/backup-archive-on-premises-applications/</a>  Review each one to understand...
