Digital Watch List - Casio and G-Shock Watch List Considerations

This is looking for fit a 5.75" wrist size.

Watch	Price in USD	Model and Links	Night Mode	Time Sync	Solar	Dial W	Lug-to-Lug	Dial H	Thickness	Water Reistance	Weight
Video with Callipers		DW-500C-1				36.8mm	41.9mm		11.4		
	$24.13	**F108WH-1**	**Comments** 👍 Looks to fit well and added to wish list.			42.6mm **42.5 (measured)**	**44.5mm (measured)**	**35.38mm (square shell) (measured)** **40.65mm (measured)**	10.26mm **10.68mm (measured)**	30m	3.35 Ounces
	$24.95	F108WHC-1A	LED **Comments** ❌ Unless there are feature differences, I like the out of release F108WH-1 black border better. 👍 Looks like it will fit well			See above	See above	See above	See above	100m (per Amazon but this does not look right)	
 	$120	GMD-S5600-7	Light LED backlight (Super Illuminator) Afterglow White version looks nicer than the black which has the brown surround.			40.5	45.7		11.9	20 bar	

 	$69	DDW5600E-1V GMD-DWB5600SF-7 GSHOCK	EL Backlight, afterglow **Comments** ❌ Loses against the GWM5610 which has following advantages, • Thinner • Time Sync • Solar	none		42.8mm		48.9mm	**13.4mm**	200m	
	$140	GWM5610-1 vs DDW5600E-1V GWM5610**U** GSHOCK	Full auto EL light, afterglow, time sync, solar **Autolight** ~Sep 2021, a silent upgrade was done with the **GW M5610U**, with the following differences I care about, • Visually top rights says "Light" instead of "EL Back Light" • **Light** - The green electro-luminescen "backlight" is replaced with a white LED display from the left (hotspot but less power and fades slower) - not sure I like this better... according to the comments by article author looks the same ➖ • **Light** - New light has an option to remain for 3 sec versus the older 2 sec. ➕ • **World-Time** - Miami, Toronto, and Santiago were sacrificed, while Kathmandu, Buenos Aires, and Fernando de Noronha were added • Permanent Display of "Home Time" when in "World Time" ➕ • **Stopwatch** - No longer shows 1/100 of a second for full duration of stopwatch and only available at the first hour. • **Stopwatch** - However, shows current time even when timing. ➕ • Date format MM/DD has option for DD/MM **Comments** 👍 Fit well on my 5.75" but ideal would be slightly smaller. Turned out a nice fits for my brother-in-law who has what looks to be 6.5" wrists.	Radio	✅	43.2mm		46.7mm	12.7mm	200m	
	$550	GMWB5000D-1 GSHOCK Similarly there's a GW5000U	Super Illuminator LED Light, afterglow	Radio & Bluetooth	✅	43.2mm		49.3mm	**13mm**	200m	

Not so much GSHOCK, but interesting articles on the CASIO FW91's - https://www.benswatchclub.com/
